Perth, Western Australia, Australia.

A highly reliable and hardworking individual that values honesty, self-motivation and team project environments. Professionally trained Mechanical technician, with a proven history in the Oil & Gas and Mining industries. Experienced in machining, general mechanical, flange management & Rotating Equipment for light industrial gas turbines and ancillary equipment. Proven experience working as both a Mechanical Technician and Rotating Equipment Technician that values safety.

### Formal Education / Trade

#### Mechanical Engineering – Machining Level 4

- New Zealand  
Qualifications Authority
- Completed May 2010.

### Competencies / Training

UKOG / UKOOA	Valid 2021
BOSIET	Valid 2021
CA-EBS	Valid 2021
MSIC	Valid 2023
CSTP	Valid 2023
Basic Rigging	Valid 2023
Dogging	Valid 2023
Working at Heights	Valid 2020
Confined Space Entry	Valid 2020
Elevated Work Platform	Valid 2023
Passport – NZ	Valid 2027

### Core Skillset

Light Industrial Gas Turbines ✕

Flange Management ✕

Solar Turbines Gas Turbines ✕

Routine RE Service Work ✕

Rigging & Lifting Operations ✕

Component Overhauls ✕

Mechanical Team Lead ✕

Machinery Installation ✕

Oil Changes & Flushing ✕

Process Piping & Bolting ✕

### Formal Employment History

Rotation Solutions Pty Ltd – Perth, Western Australia

- Rotating Equipment / Mechanical Technician
- January 2018 - Present

Legeneering – Perth, Western Australia

- Mechanical Technician
- January 2017 – January 2018

CSI - Mechanical Fitter – 2016

Fugro – Mechanical Fitter – 2011 – 2015

Monadelphous – Mechanical Fitter – 2010 - 2011

### Project History / Achievements

- Execute and Supervisor flange management activities of process piping on shutdowns for onshore & offshore Oil & Gas sites.
- Experienced in Gas Turbines and ancillary equipment servicing.
- Solar Turbines Taurus 70 full engine exchanges, including oversight of lifting and rigging operations.
- Solar Turbines Centrifugal compressor replacement activities.
- Specialist mechanical support for installation of new packages.
- Execute condition assessment activities on Solar Turbine packages.
- Completing Turbine & Package preservation activities on Solar Turbine's Saturn 20, Centaur 50 and Taurus 70 sets.
- Executing turbine oil flushing, tank cleaning and replacement.
- Executing Laser and dial alignment on smaller rotating equipment.
- Support project pre-work such as development of permit packs, work scopes and work instructions.
- Support project close out including creation and completion of reports and issue tracking database.
- Leading and supervising mechanical shift teams up to four people.
- Scoping and executing process piping hot bolting activities.
- Completing machining activities onsite for minor capital projects.
- Assessment and overhaul of Turbine package components, including tubing replacement and installation.

### Site Review Ratings

★★★★★ (4.70)

**“Team-player with  
excellent  
communication”**

- Supervisor, Offshore FPSO

★★★★★ (4.61)

**“Knows our Safety  
Management system  
like he is core crew”**

- Supervisor, Offshore FPSO

★★★★★ (4.87)

**“Pressure integrity  
attention to detail for  
leak free RTS”**

- Gas Plant Supervisor
